Y the W makes the difference!

February 3, 2012

Dear YWCA Friends,

In light of the recent decision by Susan G. Komen for the Cure to withdraw grant funding from Planned Parenthood breast cancer screening programs, we are sure that many of you must be concerned about the impact on women's health. We at the YWCA Princeton share your concern over any situation that makes it harder for women to access vital breast cancer information and screening.

I want to assure you that the YWCA Princeton Breast Cancer Resource Center is continuing to work tirelessly to offer breast health information to women of all ages and backgrounds in our community, and to provide direct services to local breast cancer patients and survivors to help them live with, through, and beyond breast cancer. BCRC provides more than 6,000 individuals every year with free information and support programs and services including support groups, counseling, wigs & prostheses, mind/body wellness programs, financial assistance, resource materials, community outreach, and much more.

Sincerely,

A handwritten signature in black ink that reads 'Judith D. Hutton'.
